

Westside environmental performance

You need clear evidence to support your environmental credentials. We can provide it.

Thanks to the **Life Cycle Assessment (LCA)** method, Steelcase can quantify the product's environmental impacts to set the stage for further improvements. This method, based on ISO 14040 and 14044, is selected by the European Union for environmental evaluation. It allows us to measure the environmental impact of our products throughout their lifecycle: materials extraction, production, transportation, use and end of life.

The results are published in an **Environmental Product Declaration (EPD)**. Ask for Westside's EPD to find out about its environmental impacts (CO₂ emissions, waste, etc.).

End of life

Up to 97% recyclable by weight.
Quick and easy disassembly (the structure and shell of Westside are assembled without screws).
Plastic parts clearly labelled for easy sorting and effective recycling.

Use

Designed for a long product life.
Maintenance information is available on steelcase.com

Transport

Minimised packaging weight and volume to improve filling rates and save energy for shipping.

Materials

14% recycled content by weight.
PVC-free.
100% recycled cardboard and 30% recycled LDPE film (Low Density Polyethylene) in packaging.
Water-based inks without solvent on packaging.
Westside weighs only 4.8kg. It comprises just two components: a single seating shell and a tubular frame. These are made from only two materials, polypropylene and steel, the use of which is minimised by the integration of gas veins into the shell.

Production

ISO 14001 certification of the Sarrebourg site (France).
Powder coat painting: VOC-free and free of heavy metals.
The powder coat painting that does not attach to the product is reused in the painting process.

Love how you work.®

You require official certifications. We can deliver them.

EPD **Environmental Product Declaration (EPD).** Based on ISO/TR 14025, its purpose is to communicate precise and verifiable information about a product's impact on the environment at all stages of its life cycle.

NF Environnement certification. Based on ISO 14024, this French voluntary certification mark is awarded to products that have a reduced effect on the environment during their life cycle.

Oeko-Tex 100. This certification is awarded to a selection of pure wool and polyester fabrics, guaranteeing that limit values are respected.

European Ecolabel (Flower). This certification is awarded to a selection of pure wool fabrics, guaranteeing that products meet stringent quality and environmental performance criteria.

You care about the end of use of your furniture.

We offer options - be it refurbishing, charitable donation or recycling.

Visit steelcase.com to discover more about Steelcase's unique ecodesign strategy.

Westside Dynamic Seating

Steelcase

B7428

In the office

Westside's ergonomic shape and high quality finish are good for short meetings, training and teaming.

A clear line that follows the way you sit

Westside's smooth shape and clean, flowing lines allow true **freedom of movement** once the user is seated. Plus at only 4.8kg it's light enough to be easily moved around.

Out of the office

Westside works well in spaces like canteens, universities, medical facilities and welcome areas because it's easy to clean, store and move around (for indoor use only).

Westside can be stacked 8 high independently and when using a dolly, or up to 15 for a trolley.
